DISCRIPTORS: *Drugs, Pharmacology, *Propanes,
*Chlorides, *Analgesics, Anesthetics, Toxicity.

On the basis of the experience gathered from about
30,000 light anesthetics in Germany, (isopropyl
chloride) is a useful substitute for ethyl chloride, and
can be considered capable of replacing "Trilene" as an
analgesic. As with ethyl chloride, the excitation stage
must not be exceeded, and should be avoided altogether.
